

## OPTOMAP Digital Wellness Retinal Photography

**Why Dr. Darby and Dr. Wright recommend the OPTOMAP:**

**The OPTOMAP allows us to see the variations in the eye's structure .**

**Usually takes the place of eye dilation without any side effects of blurred vision or light sensitivity.**

**Images can detect undiagnosed diseases in the eye and body such as macular degeneration, glaucoma, diabetes and cancer.**

**Early detection can prevent vision loss or other complications.**

**YES, I elect to have the OPTOMAP of my retina for \$45  
(Patient Responsibility)**

**NO, I would like to have my eyes dilated.**
