

OPTOMAP Digital Wellness Retinal Photography

1. The OPTOMAP is a photo taken of each individual eye.
2. There are no side effects from the OPTOMAP.
3. This helps our doctors check the health of the back of your eye (I.E. the retina and optic nerve).
4. Dr. Darby and Dr. Wright recommend choosing the OPTOMAP in lieu of dilation drops.

PLEASE CHOOSE ONE OPTION:

_____ I elect to have the **OPTOMAP** photo for **\$45**. (Patient responsibility)

_____ I would like to have my eyes **dilated**. **IMPORTANT:** Selecting dilation may add up to **30 minutes to your visit while the eye drops fully take effect**. (No additional cost)

Patient Signature: _____ Date: _____
